

AES 67 & Dante

The AES67/USB card of the AXUM system can communicate with all equipment which is AES67 compliant.

When speaking about Dante there are two flavors :

- Native Dante equipment (This is older equipment which does ONLY support native Dante and is NOT AES67 compliant)
- Dante + AES67 support equipment.

Do we offer a AES67 card with Dante support?

Well, it depends on the equipment you want to connect.

If it is equipment which supports only native Dante it won't work!

If the equipment is Dante WITH AES67 support, then it will work!

Please read the info on these links:
